

Scheduling

The sample schedules below have been provided to assist you in choosing the best itinerary for the program you would like. When selecting your classes and dividing your students into class groups, please remember the following guidelines:

- **Camp will provide one instructor to you free of charge to help teach classes** Additional staff members may be available for the additional charge of \$50 dollars per staff member per day, please contact the O.E. Director to discuss the possibility.
- While the ideal class size depends on which activities that you choose, the base group size should be between 15 and 20 students.
- If you have a schedule that you would like to follow while you are at camp, please submit that to the O.E. Director at least 2 weeks before your trip so that we can accommodate other groups. If you get the schedule to us after that deadline we will try our best but it will become harder to keep things how you requested them and may need to be rearranged to fit with other groups.
- The O.E. Director will create a schedule based on your class requests and, with your input, determine a schedule that works well for your group. To accommodate for a round-robin style of scheduling, some class sessions may be substituted with additional time for recreation activities or with other camp-led or school-led activities, depending on the total number of class groups and the classes requested.
- Some classes, like Predator-Prey, are best delivered as one session taught to the entire group.

- Many schools will choose to bring their own lunches for day programs in order to cut costs, but we do have a kitchen that can serve a hot breakfast, lunch, and/or dinner if desired. Please contact the O.E. director to inquire about this option.
- If you want a recreation time for your day trip then indicate which class rotation you would like replaced by recreation time.
- Some classes do take more time than others do, some can be adapted to a shorted time while others cannot; please contact the O.E. director about those adaptations.
