

Environmental Education Classes and Activities

Each description includes a summary of each class, a list of key concepts, suggested grade levels and best class size. The class size listed is for one group at a time, although it is possible to run multiple groups of the same class during the same period for most classes.

We offer these classes currently, if you have a favorite class from previous years that you would like us to run please contact the O.E. director to make arrangements. Most of the classes are easily modified to work with different ages, number of students, or lengths of time, contact camp to discuss any changes that you would like to make.
